21.01 I had to come back just one more time before I head off overseas - felt a bit guilty for taking up so much space in the old visitors book, so I had to bring up a new one (just so I could write another essay!)

A message for the Caritas College trekkers of 2000 - Wondra group - well done! The hut makes it all worthwhile! Wilpena group - keep walking!! & have a great time!
- Angela Benedetti. ☺ (Pt Augusta)

PS. The new visitors book is prit in honour of Sarah Morris, who always wanted to come on trek, but never made it here, though no fault of her own! This one's for you, Sarah!

12.01 Back again to Farewell Angela but I'll be back again! Go Wilpena Trekkers its an amazing walk - I did it in 2001! Di Strongman

12.01 8.9.96 & 2.9.97 are the dates of my two previous visits. Today Di + I have brought Angela (6 times Flinders Trekker) to say farewell & replace the original diary. [It appears Caritas College groups get carried away when entering their observations & have dominated space in the original book].

It was great to re-read all the entries from past Trekkers from Caritas & the ones who have been here since Sept. 97. which I had not read before. It is great to see all the positive comments (mixed with a few initially negative ones) and the obvious personal growth that has taken place within our students. I hope they all have pleasant memories still. It makes all the hard work organising Flinders Trek worthwhile.

I will be back again ... I know where but not quite when!

Javor (Jax) Goy, Chris & Sally - 2 day hike from Rawnsley Pk Station. Beautiful countryside & very well marked Heysen Trail. Very impressed. Although Hut lovely & clean. I don't know what to write, my hands saw my backs saw, my feet saw and my shoulders are saw! It was fun though, I hated going to the toilet with no long drop it was gross! I went with my Uncle Morry and he was o.k. but he can be a little bit annoying. @ times.

13-16/8/2002. Just a wondrously special week from William to Kings Mt - Otago
College here to students and supervisors (Wendy & Jack). What a wonderful
time with a really good orientation class of people. I see most of these people
taking this experience with them into their adventures as people who are not just
most of these mental and physical capabilities. This was my first year and all
things primitive I would love to share this experience with more young people
throughout to all who make the world into facilities for all people available.

Well finally made it. 1 1/2 hours in the Magna & I'm well into my 2nd hour on trek 2002. A broken leg has slowed me down but did not defeat me. "Ange you'd be proud of the commitment."

These kids would have been good to go with & they were pleased to see me (or was it because I brought cans of pepsi for them).

All the best everyone, be pleased with your efforts when you get this far.

It's about 10:30am and we are packing all our stuff. We have come here from ~~to~~ Morlana Scenic Drive. We camped at Arkapena Station for 2 days and then at Red Range camp site.

A couple of us slept upstairs and thought it was gonna be heaps cold but it wasn't until the morning came.

I think Mayo Hut is awesome!! I can't believe so many people have been (and stayed) here, it's quite unbelievable thinking of all the experiences/times that have been had in this hut. We gotta go!!

Well done guys (& girls) for pulling through after the ker. night incident. It made us stronger as a group and the sight of the hut took away the pain & brought back the life in us. Unfortunate that Miss Benedetti couldn't be with us this year, and although we didn't make up a full song we were singing most of the way! :) The walk wasn't easy but I'm glad we all did it, some of the scenery was absolutely magnificent! Thanks to all the kids and adults that made yr 10 trek, and goodluck to the future yr 10 trekkers (especially Wronka) hope you have as much fun as we did

♥ Me! ☺

P.S. Sarah & I were the only ones to combat traction of swim in the water hole but it felt sooo much better after

12/10/04 Well, I made it back. (last week 15/8/02) DID WILPAIN TO WONKA TREK. CAME THIS TIME WITH MY DAUGHTER BRANCA AND HER CUSSES MAGES. THE WEATHER WAS FANTASTIC AND SO WAS THE 22 OTHER PEOPLE ON THE TREK. I NEVER CEASE TO MARVEL AT THE BEAUTY OF THIS COUNTRY AND AT THE DEDICATION AND COMMITMENT REQUIRED BY THE YOUTH OVER TO ACHIEVE THE WORK. GREAT JOB - WELL DONE AND I HOPE THAT ONE DAY YOU CAN USE WHAT YOU HAVE LEARNED ABOUT YOURSELF AND OTHERS. RESPECT AND THANKS.

I think that the experience of trek brought us all close together ~~etc~~ - it showed how well we can work together as a team, in the good times and bad. I'm so thankful I had such a great bunch of students and adults to walk with. I'm sure that everyone came away learning something, even those of us that have done it many times before. --- and --- if you need to know anything about the Dumb Dumb sticks, just ask Murray!

The walk was pretty good, it was just a pity Peter wasn't able to get to the end.

The walk was icing (I wont lie) BUT, think it is something you have to do at least once to really appreciate what we have at home, but the beautiful land we have here. Kendall & I had a great time waking up to ice all over our tent on Wed morn & enjoyed waking everyone up on Thurs morn! The hut is great (we are all crammed up on the top bunk) and thanks to Michael Malcolm & Jenny that came up spend the last night with us.

walks among the creek gums. She loved to get away from

and reminiscing - probably re-living some of her childhood
experiences. As another perfect day dawns, we move on

who said they had it so tough, (only 2km) well I didn't get to stay
here the night after a hard day along the river and with the night's
stars twinkling to me and a new moon giving me no guidance, I set
up camp about 1 km north along the rocky path. I'll just have to get
out of bed earlier I think.

I was lost here in July and I quote myself saying, "the end
is not in sight" well on the 24th of September (that one day in
September) grand final day, the end was in sight and that
was Victoria Harbor and with a big whoop of Joy I became
~~an~~ an end to ender on the Hyson trail

one of my great achievements in life, completing Australia's
biggest bushwalk and not to forget how mother nature
blessed me with the sun, the rain, the hail and the gale
force winds even that I still don't ^{really} appreciate the last 3
weather conditions, so as I sit back here having spent a
few relaxing days in this little piece of paradise, I
realize I have a lot to be thankful for, for having had the
chance.

Ped Adams OZ - Ericks Ericks OS ☺

We live in the cottage up the road, so we're not really
camping here, but we're still the best! This is a
great place, so don't ignore it.

We've been visiting Wilpena found heaps of lockhairs, Mawker
and we've also been crotching sheep. Personally, I
love it. I recommend Jarvis' Hill Lockout, Mt O'Brien
Briage and this place! ~~It~~ It is October and it is
really green (it's a good year for farmers - lots of rain).
If it wasn't for the bumpy roads and flies, I
would call this paradise.

I can't think of anything else to write - so I won't.

This is a lovely hut someone left us in it. On the way we saw a stragway sheep and 6 wedgetail eagles one very small female flew over us and big ones flew away. We went for two walks. The hut is nice and cool to look and stay in even know the property is very dry it attracts lots of wedges and rabbits.

Sun 24.6.07 (we think!) Ruth Rice, Dorothea Muggow-

Dawling, from Lucas,

walking north to south from Wilpena. Glad to be by the fire after 2 nights of frosts and frozen water in our bottles (last night).

Dropped in to Mayo Gorge - amazed to see the difference through there after the flood earlier this year - unrecognizable.

* There is no water at Arkaba / Red Range Shelter *

due to broken faulty inlet pipe. There is water in Slacks Creek north of here - some patches very good. lovely to be staying here again (Ruth) - last time was 1999 as first major section of trail done - have now completed + sealing section. Dorothea

Five wedge tail eagles soaring overhead at junction of Murrumbidgee, Dorothea and Mayo creeks. Beautiful sight! Walking out to Hahner / Tarsalium road tomorrow. Just days of walking left (Yozona & Hut Creek sections) and I re

finished the trail (Dorothea)

Accompanying Ruth Dorothea in a favorite section of the trail. Arrived here to find a lamb stuck in the mud of a waterhole managed to get message Peter McJames who dove waded thigh deep into the mud to save it. (Yvan Lucas)

26th July 07. Day 6 of 52 days of working time. So glad to see such a wonderfully restored hut for us workers. The guys did a fabulous job. Thanks Jess.

16 Aug 07 I'm wandering down the path from Parachitna when at Red Range I get clattered by a southerly westerly. It's cold and wet and windy and while I'm packing up my wet tent I'm thinking 'This is enough, I'm crazy staying out here in these conditions. Finally, hardly able to stand up in the wind, I reach myo. Well, tears come to my eyes. What a wonderful break. What makes it even more special is I discover it was restored by my old mate Paul Nicholas and his team (Paul is now a wandering preacher in QLD, stopping anyone who will listen to talk about his god.) Thanks mate, Owen S.
P.S. The wind has dropped, the sun is out and I'm back on track.

They've been after us for 3 days...
Those horrible fangs... They just tore Jimmy limb
from limb. I'll never forget those horrible cries of
pain. We've found refuge in this place for 12 hours
now, but they're bound to find us again soon and a couple
of 12 gauge shotguns won't hold them back for long.
I assure you I'll be dead by the time you see this
message, so don't come looking for us. Just assure me
that when you get back home give your family a
nice long hug. You don't realise how precious they are
until you... oh no, they're coming. **TONY, GET BACK IN

We have been following the English walking warrior from the start and have shortened the gap from 7 days to 4 days. Thankyou Heygen friends and South Australia! We wanted to go all the way to Mount Hopeless but unfortunately water is not that ~~abundant~~ available more North. We will return and conquer the rest.
